ECA’s approach to Assessment and Feedback and the use of a Learning Management System
Summative Feedback

Year end assessment of full body of work through portfolio submission.
Summative Feedback

Students are assessed against structured Learning Outcomes. Grade profiles correspond to students' ability to evidence understanding and application of these through their portfolio.
Formative Feedback
Provided continually, through both written and verbal means.
Formative Feedback

Students are active participants: formative feedback is viewed as a conversation between academic staff and students, constructively aligning project tasks to the Learning Outcomes.
Formative Feedback

Intended to ensure students remain focused on their objectives and keep to a positive trajectory towards a deep understanding of their learning and their practice.
